## 4. FIRST AID MEASURES

If Inhaled: P304, P340, If INHALED: If <u>breathing</u> is difficult, remove victim to fresh air

and at rest in a position comfortable for breathing.

If inhaled, move person into fresh air. If not breathing, give artificial

respiration. Consult a physician if symptoms are experienced

Skin Contact: P303, P361, P353, If on SKIN (or hair): Remove/Take off immediately all

contaminated clothing. Rinse skin with water/shower.

Flush skin with plenty of water. Remove contaminated clothing and shoes.

If irritation persists, consult a physician.

doctor/physician

Do not induce vomiting unless instructed to do so by physician. Never give anything by mouth to an unconscious person. Rinse mouth with water.

Consult physician.

### 5. FIREFIGHTING MEASURES

Extinguishing Media: Use water-spray, alcohol resistant foam, dry chemical, or

carbon dioxide. Neutralize with soda ash or slaked lime

Hazardous Combustion Products: Firefighting personnel should respond with appropriate

protective clothing, firefighting gear, and breathing

equipment as trained.

Special Protective Equipment

for Firefighters:

In fire conditions: a complex mixture of airborne solids, liquids, and gases including Carbon Monoxide, Carbon Dioxide, and unidentified organic compounds. In event of a fire, wear full protective clothing with NIOSH-approved self-contained breathing apparatus with full face piece operated in the pressure demand or other positive pressure mode. Structural firefighter's protective clothing is ineffective for fires involving Hydrochloric Acid. Stay

away from ends of tanks. Cool tanks with water spray until well after fire is out.

### 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions: Use personal protective equipment. Always ensure adequate

ventilation. Keep unnecessary and unprotected personnel

from entering.

Environmental Precautions: Contain and recover liquid when possible. Do not let product

enter drains. Neutralize with alkaline material (soda ash, lime) then absorb with an inert material (e.g., vermiculite, dry sand, earth) and place in chemical waste container. Do not use combustible materials, such as saw dust. Do not flush to

sewer!

Containment and Clean Up: Soak up with inert absorbent material and dispose of. Keep in

suitable, closed containers for disposal.

#### 7. HANDLING AND STORAGE

Safe Handling: Keep away from flames and hot surfaces. Use personal

protective equipment. Always ensure adequate ventilation.

Safe Storage: Keep containers tightly closed in a dry well-ventilated place.

Containers which are opened must be carefully resealed and kept upright to prevent leakage. Store away from incompatible

materials. Do not freeze.

# 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### **Exposure Limits**

Component	CAS Number Exposure Limit		Basis
Phosphoric Acid	7664-38-2	1 mg/m3	OSHA
Ammonium Biflouride	1341-49-7	2.5(f)mg/m3	OSHA
Hydrogen sulfate	7664-93-9	1 mg/m3	OES

General Controls: Always ensure adequate ventilation and that working areas contain

safety showers and eye wash stations. Handle material in accordance

with good industrial hygiene and safety practices.

### Personal Protective Equipment

Eye Protection: Tightly fitting safety glasses or goggles should be sufficient. Have

eye-wash stations available where eye contact can occur.

Hand Protection: Handle with chemical resistant gloves. Gloves must be inspected

prior to use. Wash and dry hands after use.

Skin Protection: Wear long sleeves, a chemical apron, or other protective clothing

to prevent skin contact. Safety showers should be located in work

area where skin contact can occur.

Respiratory Protection: Where risk assessment shows air-purifying respirators are

appropriate, use a NIOSH-approved full face respirator with appropriate cartridges. Always ensure adequate ventilation.
